

# IWDYN'07

***First International Workshop on Dynamic Networking at***

***INSA Rennes, auditorium Bonnin***

***4 - 5 September 2007***

**The objective of the workshop is to gather researchers working on hot research topics related to dynamic networks. The workshop is based on selected invitation.**

**Topics of interest are:**

- **Dynamic network modelling**
- **Analysis of dynamic properties in networks**
- **Wireless and dynamic network architectures**
- **Routing in dynamic networks**
- **CAC, QoS management, handover in dynamic networks**
- **Energy conservation in wireless networks**
- **Services based on sensor networks**
- **Performance analysis.**

**The workshop is organized jointly by INSA (Institut National des Sciences Appliquées) and IRISA (Institut de Recherche en Informatique et Systèmes Aléatoires); it is cosponsored by AUF (Agence Universitaire de la Francophonie), INRIA (Institut National de Recherche en Informatique et en Automatique - action STIC - Universities of Tunisia), ENST - Bretagne and the intergovernmental cooperation PHC Balaton between France and Hungary.**
