

Anatole Lécuyer (www.irisa.fr/siames/GENS/alecuyer) has been a Research Scientist at INRIA since 2002. He graduated from Ecole Centrale Lille, France, in 1996, and received his M.S. in 1996 from University of Lille 1, France. He received his Ph.D. in Computer Science in 2001 from University of Paris XI, France. He spent one year in the French Commission for Atomic Energy, Fontenay-aux-Roses, France, as a research engineer. At IRISA, Rennes, France, he is a member of the BUNRAKU research team. He is currently the coordinator of the “Open-ViBE” French National ANR project (www.irisa.fr/bunraku/OpenViBE/) and leader of the Haptic Interaction Working Group of INTUITION IST European Network of Excellence (www.intuition-eunetwork.net/). His main research interests include: virtual reality, 3D interaction, haptic feedback, pseudo-haptic feedback and brain-computer interfaces.
